

Compact Slitter

Type	Max. mother reel width mm	Max mother reel diam. mm	Min.Slit strips width mm	Max. slit strips diam.	Double Winder multi clutches shafts	Double Winder air expandable shafts	Mother reel Unwinder expandable shaft	Razor blade Tool Holders included	Shaft core holder	Connection to network
EXCELENT 105	1050	400	10	400	YES	--	YES	4	3"	240V-50Hz (6Bar)
EXCELENT 130	1300	400	10	400	YES	--	YES	6	3"	240V-50Hz (6Bar)
BRAVO 105	1050	400	10	400	--	YES	YES	4	3"	240V-50Hz (6Bar)
BRAVO 130	1300	400	10	400	--	YES	YES	4	3"	240V-50Hz (6Bar)

Unwinder Element

Type	Max. mother reel width mm	Max mother reel diam. mm	Mother reel Unwinder expandable shaft	Shaft core holder	Connection to network
JUMBO-PLATFORM	1050	800	*Od	3" or *6"	240V-50Hz
JUMBO-PLATFORM	1300	800	*Od	3" or *6"	240V-50Hz

*Additional air expandable Unwinder shaft for Jumbo-Platform, is supplied on demand.
6" inch core shaft is supplied on demand.

The "Excelent" serie is mainly focused for productions of narrower strips under 20mm width and thin materials.

Quality and Service

The Albaco's modular Slitters are totally designed and built in Italy. All electronic components comes from primary brands in the market. The stable steel chassis and high quality of mechanical devices, guarantees maximum reliability, measurement accuracy and easy using. Onsite installation or factory trial and training can be required. The after selling service is done from Albaco manufacturer directly.

MODULAR SLITTER SYSTEM

COMPACT OR JUMBO INLINE UNLIMITED SLITTING

Full Electronic controls

Friendly touch screen 7" wide. Saving Job parameters menu. Metric and Inch measurement.

Reliable and fast Positioning

Micrometric width adjusting and graphical vision of positioning. Really easy placement of razor blades tool holders!

Razor Blade tool Holders

Accurate blade holder positioning on multi groove guidance. Durable steel blades 4 cutting edges each, coated by ceramic treatment. Always perfect slitting.

Winder Shafts

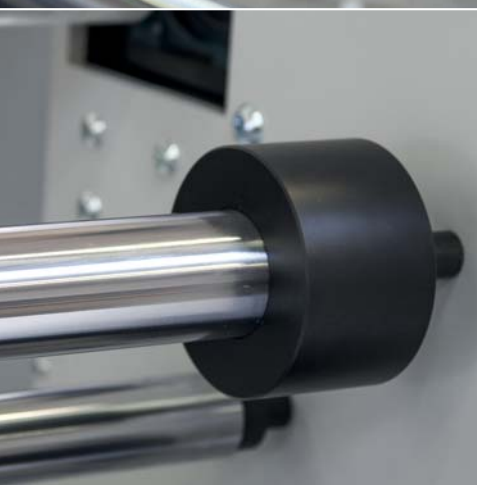

Double winder mandrel shafts both cantilever. Automatic positioning by proximity sensor. The unload of slitted strips never been so safety! Every windings shaft is equipped with independent. Clutches to obtain best results of narrow and thin strips slit.

Jumbo-Platform Element

Unwinder Jumbo-Platform for reels up to 800mm diameter quickly linkable to the Compact Slitter Unit. The Jumbo's unwinder platform can be easily risen for a comfortable transport.

Quick start Up

Reference points for guidance of material and the compactness of machine allows the start up in few minutes!

Advantages of Modular System

Every Slitter unit can be equipped with mechanical and electrical devices for future connecting with Jumbo-Platform. The unwinder shaft of mother reel is perfectly interchangeable, so can be installed on Slitter Unit or Jumbo-platform.
